The 10th International Conference on Human System Interaction (HSI 2017) will be held in University of Ulsan, Republic of Korea, from July 17th – 19th, 2017. The Conference offers an unique and interesting platform for scientists, engineers and practitioners throughout the world to present and share their recent research and innovative ideas in the interactions between human and systems .

About HSI

Rapid changes in information technologies have lead to a boost in the strength and efficiency of human activity. These technologies have an influence on every area of human life, including education, science, business, leisure time, entertainment, government, and health care. Human life is greatly dependent on these systems' efficiency and performance. The HSI conference has been prepared as a platform for exchanging ideas, knowledge, skills and experiences in interactions between man and these systems. The HSI conference series has become one of the most important international conferences in the field of human system interactions, human system science and engineering, human factors in large complex systems, human space computing and cyber-physical systems, human environment interactions, and social technical systems

Topic of Interests

Artificial Intelligence, Human Machine Interaction, Education and Training, Cyber Security in HSI, Sociological and Psychological Aspects of HSI, Cyber Physical Systems, Human Space Computing, Internet of Things and Smart Homes, Health Care and Assistive Devices, Extreme Interfaces, Humanity in Wireless Mesh Network, Vehicular System, Multimedia Human Communication, Personal Communication System, Personal Mobile Ad-hoc System, Wearable Network and System, Network Control and Management, Security, Privacy and Trust, Human Dependable System, Multi-agent System and Applications.
